

Community Health Webinar Series

Pediatric COVID Vaccination

Vaccines are our best hope to end the COVID pandemic.

COVID vaccine is available for children age 5 and up, and boosters are now authorized for those 12 years and older. Vaccines for children age 6 months and up may be authorized next. Marin County is among the most highly-vaccinated areas in the nation. But many questions and concerns remain when it comes to vaccinating our children.

In this presentation, our specialists will discuss:

- Why children and teens should get vaccinated
- Upcoming COVID vaccinations for 2-4 year olds
- How parents and caregivers can determine if toddlers are having side effects
- Helpful tips to support children 6 months-4 years during their vaccine
- Booster recommendation for children under 18
- Where and when to get vaccinated
- Vaccine requirements in schools
- The changing rules of masking in schools and socially
- Variants and levels of contagion
- Emergency Room and clinical treatment
- Immunocompromised children
- Confronting denial and separating fact from fiction

We'll also have time for Q&A at the end of the presentation.

Featured Speakers:

Lisa Santora, MD

Deputy Health Officer, Marin Department of Human Services

Shandra Taylor, MS, CCLS

Child Life Specialist

Catherine Taylor, ARDMS

President, "Ouchless ER" Project

About Our Community Health Seminar Series

Marin Healthcare District's Community Health Seminar Series offers periodic educational forums for the Marin community on relevant health-related issues.

MONDAY,
APRIL 25, 2022
5:30 – 6:30 pm

Via Zoom
